

## Project Planning Guide

**Ask** – formulate relevant meaningful questions/develop a thesis statement

Completed by:

**Acquire** – brainstorm sources of data and information

- 
- 
- 
- 
- 

Completed by:

**Analyze** – collect, verify and organize information

- How are you going to collect and organize info & data?

Completed by:

**Apply** – synthesize the information and create a product

- How will you use & interpret the information you have collected?
- What type of product are you going to create to deliver your message?
- How are you going to achieve this/what do you need?

Completed by:

**Assess** – cite sources(easybib.com), reflect on the process

- Use Easybib.com to cite your sources.
- Somewhere in your project include a reflection on your learning.
